

CAMILLE PETROU

Software Developer · Computer Science Student

La Pocatière, QC camille.petrou@gmail.com github.com/TheWindFlower thewindflower.github.io

PROFILE

Passionate and self-taught computer science student with 5+ years of hands-on experience building diverse software projects. Proficient across multiple programming languages, development tools, and systems concepts. From embedded electronics to full-stack web applications.

TECHNICAL SKILLS

Languages: Python · JavaScript · TypeScript · C++ · C# · Dart (Flutter) · SQL · HTML/CSS · Bash/Shell

Frameworks & Libraries: React · Vite · Flutter · SDL2 · OpenCV · fl_chart · SQLite

Tools & Platforms: Git · GitHub · Linux (Debian, Arch) · Arduino · ESP32 · Office 365

Networking & Systems: Cisco CCNA (Networking) · TCP/IP · Linux system administration

Practices: Open-source contribution · Code review · Branch management · Pull requests

PROJECTS

SkyBlock Quant Terminal · *React · Vite · Tailwind · REST API · Data Analysis* 2026 – Present

Web application for financial arbitrage analysis on the Hypixel SkyBlock marketplace.

- Integrates the official Hypixel API and scraped crafting recipes to surface optimal profit-flip opportunities in real time.
- Implements multi-mode flip analysis: simple flips, NPC buy-to-sell, and craft-to-NPC arbitrage.
- Designed a responsive UI with Tailwind CSS and React for efficient data browsing.

Workout Tracker · *Flutter · Dart · SQLite · fl_chart* 2024 – Present

Cross-platform mobile fitness application for structured training logging.

- Enables fully customisable exercise tracking: sets, reps, weight, and bodyweight history.
- Persists all data locally with SQLite and visualises progress over time with fl_chart graphs.
- Built entirely with Flutter/Dart for iOS and Android from a single codebase.

Game of Life · *C++ · SDL2 · Simulation* 2023

Real-time cellular automaton simulation implementing Conway's Game of Life.

- Renders a live, interactive grid with SDL2; supports cell toggling and simulation speed controls.
- Demonstrates systems-level programming and real-time rendering in C++.

ASCII Filter · *C++ · OpenCV · Computer Vision* 2023

- Converts images, video files, and live webcam feeds into ASCII art in real time using OpenCV.
- Explores image processing techniques including pixel-to-character luminance mapping.

Instagram Profile Rotator · *Python · Automation · Web Scraping* 2022

- Automates scheduled rotation of Instagram profile pictures without manual uploads.
- Demonstrates practical use of Python scripting and HTTP automation.

WORK EXPERIENCE

Team Member · Tim Hortons · La Pocatière, QC *Jan 2023 – Present*

- Delivered fast-paced customer service and cash management in a high-volume environment.
- Coordinated inventory logistics and stock management.
- Recognised for reliability and teamwork across rotating shifts.

IT Maintenance Intern · Zot Informatik · Saint-Leu, Réunion *Jan 2020*

- Assisted in computer hardware repairs and software installations for client machines.
- Managed support tickets and communicated directly with customers to diagnose issues.
- Gained hands-on exposure to the workflow of a professional IT maintenance workshop.

EDUCATION

DEC – Computer Science Technology (Technique de l'informatique) · Cégep de La Pocatière · Québec *Jan 2023 – Present*

Baccalauréat Technologique STI2D · Lycée Polyvalent Stella · Saint-Leu, Réunion *2020 – 2023*
Specialisation: Systèmes d'Information et Numérique (SIN)

LANGUAGES

French: Native **English:** Professional working proficiency
